

GRI-G4 Guide

This GRI table sets out how the Global Reporting Initiative (GRI) 4.0 Reporting Framework has been applied to our corporate responsibility reporting process for the period January 2014 to October 2015. The purpose of our reporting process is to disclose our approach to corporate responsibility and our performance against the issues that are most material to our business and stakeholders. We also use our report to engage with stakeholders by enabling them to have a dialogue with us and understand the issues related to our business and impact.

The GRI Reporting Framework forms a key part of our commitment to continuous improvement and transparency. Our 2015 Corporate Responsibility report is in accordance with GRI-G4 and is self-assured.
